

CDI (Boys and Girls Clubs)

Place: Dunn, NC

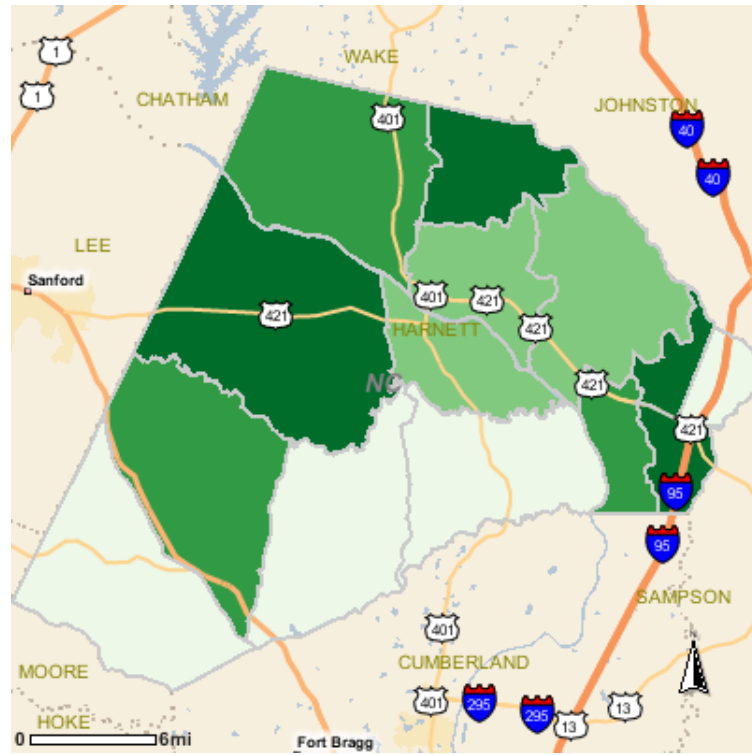

Description: This Quick Report was developed for the Boys and Girls Clubs of America.

Community Disadvantage Index

Communities can be described using a variety of indicators. One index known as community disadvantage is commonly used by social scientists to summarize the general socio-

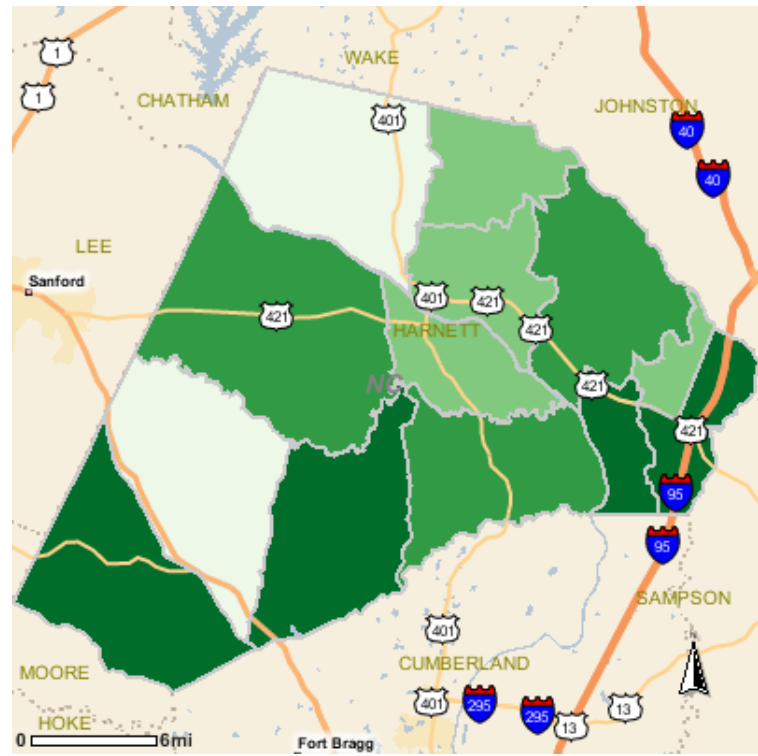

Per Capita Income

This map shows per capita income at the census-tract level. The darker shaded areas represent higher incomes.

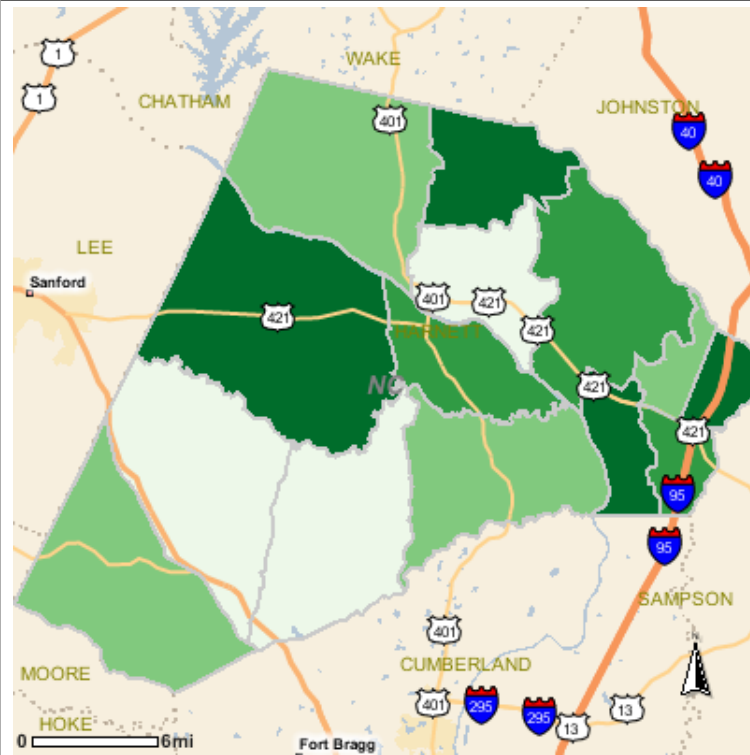

economic conditions of an area. The Community Disadvantage Index (CDI) used in the SMART System was developed by Dr. Janet Lauritsen from the University of Missouri-St. Louis. This index has been shown in prior research to be a key correlate of the risk for violence. Because it is a combination of several measures gathered from the decennial census, it is generally considered to be a more reliable indication of disadvantage than any single indicator used by itself. The CDI combines three census tract measures that were weighted on the basis of the factor analysis: the percent of persons living below the federally defined poverty line, the percent of persons receiving public assistance, and the percent of families with minor children that are female-headed. This map shows census tracts and the CDI.

% of Families that are in Poverty

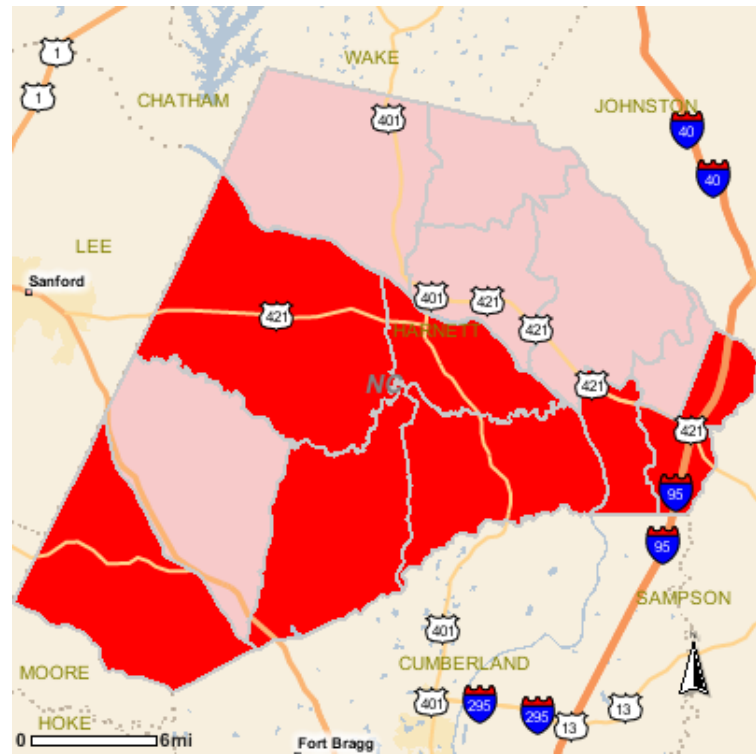

This map represents the percentage of families that are in poverty at the census-tract level. The darker shaded areas reflect higher percentages.

% of 18 to 24 Year Olds with no High School Degree

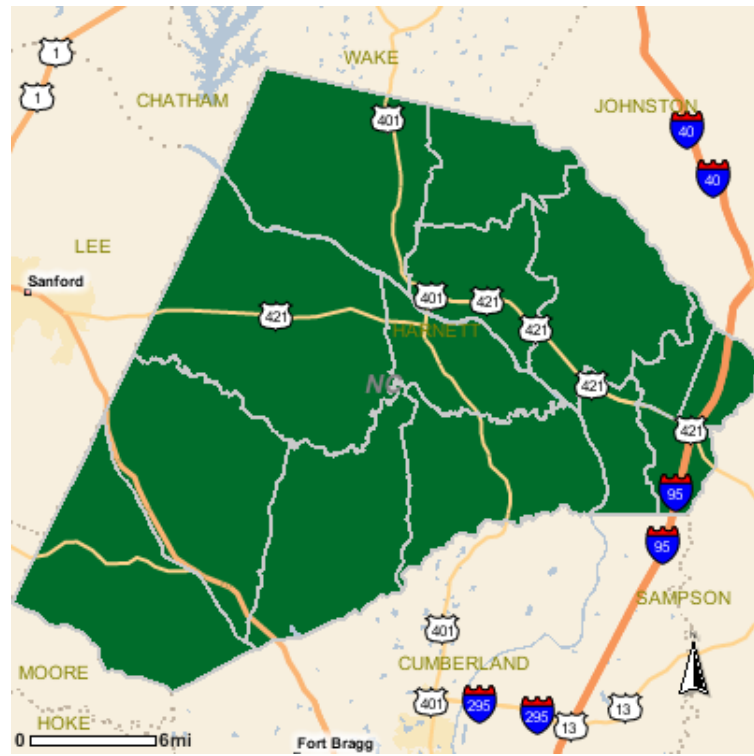

The percentage of 18-24 year olds with with no high school degree are shown here. Areas with the highest shading have higher levels of attainment.

% of Households that are Urban

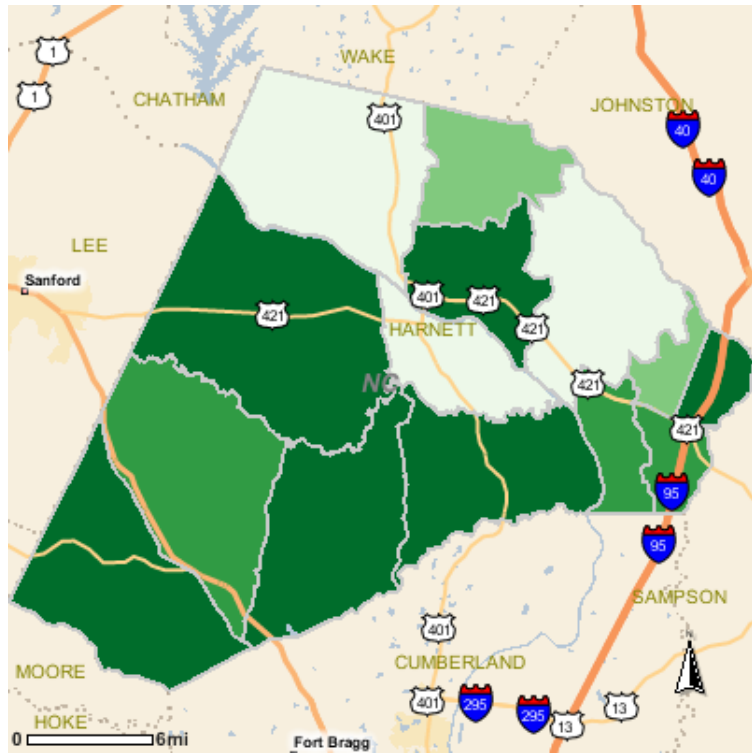

This map depicts the percentage of urban households.

% of Households that are Rural

This map shows the percentage of rural households.

% of Population Unemployed

This map shows the percentage of population that is unemployed at the census tract-level.

	% of Population that is Unemployed, 2000	Per Capita Income, 2000	% of Families that are in Poverty, 2000	% of 18 to 24 Year Olds with no High School Degree, 2000	% of Households that are Urban, 2000
